Product Video

*Close focus performance
32mm models 1.3m
42mm models 1.8m

The affordable binocular series boasting must have high end features. All binoculars in the Kowa BDII-XD series deliver stunning wide-angle performance and perfect optical clarity with Kowa XD (ED) lenses.

It is easy to see why the wide-angle Kowa BDII-XD is our most popular binocular ever produced, delivering optical performance normally demanding a much higher price tag. Kowa believe nature should be enjoyed by all and have poured every ounce of optical know-how developed over 70 years in to the creation of the BDII-XD series.

Kowa engineers designed the optics inside the BDII-XD binocular range to produce a wide field of view which means you see more of scene in front of you helping you find a subject more rapidly when out in the field or enjoying an expansive sky scape when star viewing.

The binoculars include XD (ED) fluorite rich lenses and fully multi-coated optics throughout producing ultra sharp images with high contrast.

Enjoy detailed close up views of flowers and insects with an extremely close focus function down to just 1,3m*

The 100% waterproof BDII-XD series offer extremely comfortable operation and a magnesium alloy body with tactile, tough rubber armour to protect from the elements.

The Kowa BDII-XD is supplied with a high quality case, padded shoulder strap, rain guard and lens cap.
