

310g*

Ground-breaking!

Ultra compact body
with the best optical
performance.

810g**

When the journey ahead is long or you need to travel light, discover **project compact** from Kowa. A concept to create the **highest level of sporting optics in the most compact and lightweight of chassis**. Every feature designed and considered to **push the boundaries of optical performance and durability** without additional weight and bulk. See this vision realised with the Kowa PROMINAR compact series and wherever your journey may take you, experience it in breath-taking detail.
