

Kowa

1952

First Kowa spotting scope, TS-1

At the pinnacle of optical performance for over six decades.

For over 60 years, the Kowa name has been synonymous with a level of optical excellence surpassed by none.

Back in 1952 when we first patented the prism spotting scope, the TS-1 was born - and we've been leading the way ever since with outstanding optical instruments.

Every optic that leaves our factory draws upon over half a century of advanced optical technology and development.

A lot has changed over the years, but one thing has remained the same. When you look through a Kowa spotting scope or binocular, you'll experience simply stunning images.

2012

TSN-884 spotting scope and TSN-IP4S iPhone 4/4S digiscope adapter.
